

**SPECIALTY EARTH SCIENCES, LLC**  
Fishers, Indiana

**P. Cory Smith**  
**Senior Project Manager**

---

## **EDUCATION**

Studied Industrial Technology – Ball State University, Muncie, Indiana

## **CERTIFICATIONS / LICENSES**

- Indiana Department of Environmental Management - Licensed Asbestos Inspector #191911035
- State of Indiana Fire Marshal Office - Underground Storage Tank Certification #UC2000948762
- International Code Council - Certification in Underground Storage Tank Decommissioning

## **AREAS OF EXPERIENCE**

Years of Experience – 25

- Time with Specialty Earth Sciences, LLC – February, 2016 - Current
- Years with The HydroTech Corporation – 25

Mr. Smith is a Senior Project Manager with Specialty Earth Sciences, LLC and has over 25 years of extensive experience in the environmental field. Mr. Smith has experience in groundwater and soil remediation projects in Indiana, and throughout the Midwestern and Southeastern areas of the United States.

His experience includes preparation of Phase I Environmental Site Assessments for diverse land uses including agricultural, industrial, municipal, and commercial sites. He has also completed Phase II soil and groundwater investigations of properties with petroleum hydrocarbons, polychlorinated biphenyls, metals, and chlorinated solvent impacts.

He has supervised and completed numerous soil, groundwater, and vapor intrusion investigations with local, state, and U.S. EPA oversight. Mr. Smith has also directly supervised the construction, installation, and startup of numerous soil, groundwater, and vapor intrusion remediation systems.

Mr. Smith has experience that also extends into the following areas: Spill Prevention Control and Countermeasure (SPCC) Plans; Storm Water Pollution Prevention Plans (SWP3); indoor air quality inspection and mitigation; lead based paint testing and abatement; geotechnical investigations; construction management; OSHA hazard communication compliance; OSHA hazardous waste training; and, waste characterization and minimization.

## **RELEVANT PROJECT EXPERIENCE**

**Environmental Site Assessments and Investigations** - Performed and managed numerous Phase I Environmental Site Assessments and Phase II Environmental Investigations. Project sites consisted of agricultural/undeveloped to multi-tenant commercial to heavily developed industrial properties in Indiana, and throughout the Midwestern and Southeastern areas of the United States.

**Storage Tanks** - Supervised underground storage tank (UST) closures, initial site characterizations (ISCs), leaking underground storage tank (LUST) investigations, and prepared corrective action plans (CAPs) for various clients. CAPs implemented at UST sites have included excavation, ORC injection, air sparging, soil vapor extraction, dual phase high-vacuum extraction, groundwater pumping and treatment, natural attenuation monitoring, and risk assessment.

**Groundwater Monitoring** - Managed the installation and sampling of hundreds of groundwater monitoring wells at sites located in Indiana, and throughout the Midwestern and Southeastern areas of the United States.

**VRP/State Cleanup** - Responsible for managing ongoing voluntary remediation program (VRP) and State Cleanup projects in Indiana. These projects include remedial activities associated with managing VRP projects at former (UST) and dry cleaning facilities.

**TSCA / RCRA (Scrap Yard Facility, Hartford City, Indiana)** - Performed site characterization activities associated with the PCBs and other environmental contaminants identified in soil at this site. Designed and implemented dust and stormwater migration control and treatment systems to reduce the concentrations of PCBs and other contaminants leaving the site. Assisted with the development of a Remediation Work Plan (RWP) to meet requirements of IDEM and the U.S. EPA (RCRA and TSCA) for the removal and treatment of surface and shallow subsurface soils containing environmental contaminants. The work plan also included stormwater containment, treatment and discharge compliant with an NPDES permit.

**Asbestos Abatement and Demolition (Magnesium Facility, Anderson, Indiana)** - Responsible for managing large-scale asbestos inspection and abatement following fire at the referenced facility. Coordinated extensive air sampling and analysis efforts. Prepared numerous reports which were ultimately used to settle a class action lawsuit and meet the needs of regulators. Worked at length with several regulatory agencies including, but not limited to, the U.S. EPA, Indiana Department of Environmental Management, OSHA, the Center for Disease Control (CDC), and various local officials.

**Storm Water Pollution Prevention Plans and Sampling** - Prepared Storm Water Pollution Prevention Plans (SWP3) for major packaging company with several locations throughout Indiana, and for other clients. Conducted storm water sampling, and prepared necessary compliance reports for several years at each facility.
